WALL ST. REFORM IN STREET-CLEANING MRS. OSBORNE AGAIN IN JAIL. ALL DOWN WITH DIPHTHERIA. SENTENCE OF THE CHILIANS. HATCHERIES IN FULL BLAST.

Brennan Considering the Bill.

Mayor Not in the Bill.

Mayor Grant still has under consideration the bill which has been presented for his approval by the Advisory Street-Cleaning Compurpose of devising ways and means of thoroughly cleaning the city's pavements.

In its present form the bill embodies nearly

all of the suggestions made by the Commission in a report which it had made to the Mayor and which was heartly indorsed by the then Commissioner of Street Cleaning, Hans S. Beattle.

Mayor Grant's objections to certain sugges tions in the report, however, have been de-ferred to, and in the measure which the Commission now asks him to approve, and which they hope will become a law, these sugges tions play no part.

A copy of the bill has been referred to Com missioner Brennan for a report as to its practicability, but that busy official declared this norning that he has been unable to give it reason is not able as yet to give his opinion grace to herself and to him.

of the measure.
"I shall study the provisions of the bill as soon as I possibly can," said he, "and shall be only too pleased if it will assist in solving the important problem of clean streets.

"At present I am busy as can be in getting

rid of garbage and sweepings, which have accumulated recently because of inability to get scows to the dumping boards where we ould load them for sea.

"So busy have I been with that work that I have not had even time to read the printed extracts from the bill or gain the slightest fort her. dea as to its provisions."

The measure which Commissioner Brennan has not examined provides even to minute details of what the street-cleaning force shall consist. It is to be divided into a cierical and uniformed force, the latter to consist of laborers, timekeepers, firemen, district superintendents, superintendent, dump and scow

Inspectors and stablemen.

The city is to be districted so that each abover will be obliged to clean a certain pre-

All the employees are to be given permanonth.

Mayor Grant had objected to a civil-service provision in the employment of laborers, and modified civil-service provision has been substituted. This requires the registration of all applicants for sweepers' positions who present prescribed credentials, who swear hat they are not over forty-five years of age and who pass a medical examination as to their physical ability. The Commissioner must appoint from the registered list, but can take the last, the first or any man on it. No employee of the uniformed force can be discharged without a hearing on written

charges. The idea of the measure, as stated by the dvisory Commission, is to create a force of responsible laborers, who will be assured ermanency of employment.

The cleaning of piers, wharves and bulkeads is charged in the Dock Department. Carts, trucks and other vehicles cannot be stored in the streets or on piers without a icense from the Mayor.

Mayor Grant said this morning that he will probably not be in a position to take action on the proposed bill until he has heard from he Corporation Coupsel, to whom he referred it for an opinion as to the legality of its proislons, and from Commissioner Brennan, of whom he has asked an opinion as to the practicability of the proposed system.
